RESEARCH SUMMARY

My entire research career has been revolving around generating realistically looking content given certain conditions. During my PhD I focused on research into style transfer – generating realistically looking paintings and animated movies. At Samsung Research America, I was conducting research into computer vision techniques to generate virtual humans with a particular emphasis on photorealism. These days, at Drip Artificial, I am leading the research efforts into synthesizing stylized videos given a text description.

EDUCATION

Doctoral degree study (PhD)	2018 – 2021
Computer Graphics, Czech Technical University in Prague. Advised by Prof. Daniel Šýkora	
Master degree study (MSc)	2016 – 2018
Computer Science, Czech Technical University in Prague.	
Bachelor degree study (BSc)	2012 – 2016
Computer Science, Czech Technical University in Prague.	
High school	2004 – 2012
Mathematics, Physics, and Geometry, Gymnasium of Christian Doppler.	

PROFESSIONAL EXPERIENCE

Research Advisor & Research Scientist, Drip Artificial, California	2/2023 – Present
Leading the research efforts into creating an end-to-end Generative AI framework that allows for creating stylized videos and animations based on a text prompt; in particular, text-to-video synthesis, example-based video style transfer, and propagating edits through the video sequence.	
Senior Research Scientist, Samsung Research America, California	3/2021 – 4/2023
Research and implementation of computer vision and deep learning techniques to render photorealistic virtual humans, focusing on faces. Involved conditional GANs, image-to-image translation networks, deferred neural rendering. Part of the neonlife.ai project. Resulted in 9 patents and one CVPR publication.	
Intern Research Scientist, Samsung Research America, California	4/2020 – 2/2021
Research and implementation of various image-to-image and video-to-video translation neural networks for face manipulation, e.g., adding makeup, changing skin tone, adding or removing scars or wrinkles. Part of the neonlife.ai project.	
Intern Research Scientist, Snap Inc., Los Angeles, California	7/2019 – 10/2019
Research of new techniques on training generative adversarial networks for style transfer tasks; focused on a scenario where a minimal amount of data is available, and an interactive response is required. Furthermore, developing a shader-based real-time stylization for human portraits.	
Remote Collaboration, Adobe Research, USA	9/2017 – 12/2019
Remote collaboration on several research projects, publications, and tech transfer project. Computer graphics; patch-based style transfer; neural-network-based style transfer.	

Intern Research Scientist, Adobe Research, Seattle, Washington. **7/2018 – 10/2108**
Combining neural-network-based and patch-based style transfer methods. Chunk-based style transfer method with a focus on real-time performance.

Intern Research Scientist, Adobe Research, San Jose, California **9/2017 – 12/2107**
Guiding patch-based style transfer method using convolutional neural networks, image harmonization, and histogram optimization. Integrating developed style transfer method into Adobe Photoshop.

Software Architect and Developer, Dynavix, Prague, Czechia **5/2014 – 9/2017**
Software Architecture & Development. The navigation application for smartphones. C++, Java, Objective-C, C#.

Software Developer, World of Warcraft game server, Prague, Czechia **2/2013 – 5/2014**
Software Development. The World of Warcraft game server. Extending game mechanics, scripting artificial intelligence, data-mining. C++, C#.
